

## Power Mop - Easy Cleaning Revolution

With kids and possibly cats and dogs running around the house, it's no wonder that the floors can get messy quickly. This has always meant getting out the mop, and mopping the floor is a chore in anyone's book, so anything to make it easier is a blessing.

Introducing the Flash Power Mop, an innovative new product that is here to take much of the time and effort out of this household chore, and change the way you can keep your floors clean. Not only this, it looks pretty stylish too and is user-friendly enough to make the job a breeze.

### **The Flash Power Mop has a number of features that make it simple and quick to use:**

1. **Powered Spray Action** Incorporating the cleaning solution into the mop itself, the touch of a button squirts some of this solution onto the floor so you can cut through dirt and save yourself time.
2. **Multi-purpose Cleaning Liquid** The liquid itself has an advanced formula that gets to work on dirt and grime, and leaves your surfaces gleaming.
3. **Super Absorbent Cleaning Pads** There are three layers of material that absorb dirt, grime and liquid and lock them away. The pads are non-drip, so there is no mess, and they are re-usable. If there is a spill, simply bring out the Flash Power Mop and let their super absorbent pads deal with the problem quickly.
4. **Manoeuvrability** The mop itself has a very slim and fully-rotating head allowing easy access to all those hard-to-reach places. No more uncomfortable stretching behind sofas or bending down under tables.

These revolutionary new mops are available in most supermarkets and a Starter Kit, including a mop, pads, batteries and a bottle of Flash solution, costs RRP£19.99. Refill pads and solution can also be sold separately.
